READY FOR BUSINESS. Organization of the Republican National

Copyright, 1888, by the California Associated Press.] New York, July 11th.—The National Republican Central Committee and General Committee of the National Republican League gathered to-day at the Fifth-ayenue League gathered to-day at the Fifth-avenue Hotel. California was represented by President Barnes of the State League. The National Committee began its session soon after noon and in a brief sitting authorized acting Chairman Clarkson to appoint a committee of nine to report a plan of campaign and a full list of permanent officers of the committee. A recess was then taken. The following committee was appointed to name a permanent organization: Haines of Maine. New of Indiana Fassett of New

of Maine, New of Indiana, Fassett of New York, Fessenden of Connecticut, De Young of California, Goodelow of Kansas, Davis of Illinois, Blaine of Pennsylvania, Hobart of New Jersey, Conger of Ohio, and L. C. Hark of Arkansas.

All the members of the National Committee were present except Warren of Montana and Ryerson of New Mexico. OFFICERS ELECTED.

Copyright, 1888, by the California Associated Press. New York, July 11th.—The Republican National Central Committee to-night elected M. S. Quay, of Pennsylvania, per-manent Chairman, and J. Sloat Fassett, of New York, Secretary.

They were also appointed to hold the

same offices on the Executive Committee.
The Executive Committee was chosen as follows: M. H. De Young, of California; Samuel Fessenden, of Connecticut; Geo. R. Davis, of Illinois: John C. New, of Indiana; J. S. Clarkson, of Iowa; W. C. Goodlee, of Kentucky; J. Manchester Haines, of Maine; Garrett A. Hobart, of New Jersey, and A. L. Conger, of Ohio. The Presidents of the State Leagues of Republican Clubs held a conference to-night with the National Republican Committee, but no information was given out. A conference committee has been appointed by the Leagues to confer with a similar committee of the National Republican Committee to-morrow.

St. Louis, July 11th .- Dispatches from lopeka, Kan., says the hearing on the aplication for a writ of habeas corpus in be nalf of Moore and Mrs. Norton has been ostponed till to-morrow.

Mrs. Norton is said to be very nervous o-day, and clings still closer to Moore, and most fervently avers that she will not be eparated from him

Moore and Mrs. Norton were not inrmed till this morning-and it was snown to no one but the officers—that a complaint was filed by County Attorney artis late last evening before Justice Searle against them, charging a violation of the State law in relation to marriages, which makes it a misdemeanor for an unmarried uple to live together as man and wife and fixes the penalty at not less than \$500 nor more than \$1,000, or not less than A dealer may say thirty days nor more than three months imprisonment. ### A RUSHING RIVER Unprecedented Rise in the Monongahela

-Millions of Dollars Lost. PITTSBURG, July 11th .- The reshet in the onongahela river is unprecedented, and great damage has been done to river craft and property all along the river, from the headwaters to this city. The suddenness of the rise took the river men entirely unawares, and they were not prepared when the great volume of water burst upon them.
At every point between Greensboro and Pittsburg the lowlands are under the water, and the residents have been compelled to live in the upper stories of their houses, and in some cases to seek the hills for safety. Many had not time to remove their goods, as the water came in at the rate of one foot an hour, and at Greensboro a 32-foot rise was recorded in less than twenty-four hours.

The greatest damage to the river craft occurred between 1:30 o'clock this morning and daylight. Shortly before 2 o'clock a large number of barges came down the river and struck the bridge, the huge barges turning end over end and breasting the tow-boat Barnard in against the steamer Jacobs. Every whistle on the river sounded the slarm, and as the rays of the electric light swept from side to side across the turbulent flood it presented a wild sight. Logs, barges and fuel boats were dashed against the piers of the bridge and snapped like twigs by the overwhelming force of the correct the current.

At Williamsburg, Beck's Run, a portion of McKeesport, California, Monongahelia City, Belle Vernon, Brownsville, Fayette City and other towns along the river are reported partly submerged this morning.

At 10:30 word was received that Lock No. 4, located a short distance above Monongahela City, had been carried away. The loss from this will be very heavy. A sudden rise is believed to have been caused by a cloudburst, which covered a large sec tion of southern Pennsylvania and West Virginia.

### UNSETTLED COFFEE.

There is trouble about coffee. It is too stiff in price and has been cornered, and all that, and now come the Knights of Labor and propose to boycott coffee by ceasing to into its bad ways through the operation of the free-trade idea. The Act of Congress of 1870 reduced the duty upon coffee from five to three cents. In 1872 Congress followed this up by putting coffee on the free duty flowed downward. Brazil furnished presented by his mother to my father, B then, as now, most of the coffee consumed in the United States. With the abandonment of an importation duty upon coffee by us, the price for the berry rose in Brazilian markets. The general belief that the price did not fall here as the "free listers" were certain it would do, because Elgin, Ill.), served their country faithfully Brazil put on export duty, Senator Edfour years in the Thirteenth Wisconsin munds declares to be popular error. The Regiment. The handkerchief referred to, truth is that the export duty remained having occar in the taining torty-cight years, it is a relic of political times seldom rein 1870 what it was before that date and repeated. Respectfully, no action was taken by the Brazilian Government concerning coffee whatever, until 1882, when it lowered the duty for exportation from nine to six per cent. The upward progress of coffee prices was due to the pocketing of the margin between the old of its stations in Oregon, Utah, Nevada, and the new prices by the Brazilian New Mexico (including El Paso, Texas), and in Arizona, commencing to-day, and at growers and merchants. If now coffee in all points in California, commencing on the addition to suffering from an independent arrive in San Francisco on or before the and private export tax, is being cornered 18th, but the trip must be continuous. Stopalso for a further demand upon the consumer's pocket, it is not chargeable to protection since it is on the free list already. There would be less ease in cornering the article if it were under the old tariff cut

It would be simply impossible for the corps of astronomers on Mt. Hamilton to pursue their delicate and arduous work, if the public was admitted at all time. In astronomical research time cannot always be chosen for work; it must largely depend upon atmospheric conditions, and hence it is essential that just as little of the time available for research be broken in upon by visitors, as is possible. Yet it would be improper to exclude the public entirely from use of the great telescope, and therefore one night in each week, Saturday from 7 to 10 o'clock, has been set apart in which visitors may well improve the opportunity to look through that instruto be open to the people during all the system demands it, for that one point office hours of every day of the year to inspect the instruments, etc. It is also tween this city and Ogden has more than doubled during the past two years. Police Court Cases.

Light calendars have been the rule this week in the Police Court. Yesterday morning there were only five defendants in Court. Wm. McIntyre and L. Mierhoffer had been arrested for being drunk, and were each fined \$5. Ed. Dwyer paid a fine of \$2 ( ) for hitting Pat. Deveny in the jaw. The latter was charged with disturbing the peace, but was discharged, it appearing that Dwyer struck him without provocation. The only case that attracted any attention was that of Myer Clark, arrested on complaint of Jacob Wolf for disturbing the peace. Grove L. Johnson and E. C. the peace. Grove L. Johnson and E. C. Hart represented the complaining witness in the prosecution, and Clinton L. White eighty days in the year, or just prior to the in the prosecution, and Clinton L. White and G. G. Pickett the defendant. Mr. Johnson asked for a continuance, which was strenuously opposed by Mr. White. After a long argument, in which counsel indulged in some very sarcastic remarks, the case was set for next Monday morning at 10 o'clock, and the numerous witnesses recognized to be present at that time. The arrest of Clark grew out of the difficulty between him and Wolf over the possession of the cigar-stand at 624 J street.

Came Back to Stay. In the spring of 1854 two cousins, M. J and J. L. Azervado, came to California from the Azores Islands to carve out their future in this then young State. Instead of going into the mines, they located on the Sacramento river a few miles south of this city, on the Yolo side, opposite the town of Freeport. They cleared up a farm and commenced raising grain and vegetables for the local market. In 1868 they closed out their business, realizing therefrom upwards of \$30,000, and returned to the place of their nativity. A few days ago they returned to this city, and are now looking for a business opening, intending to spend the remainder of their lives in this, which they call "the garden spot of the world." During their stay in the Azores they tried agriculture in its various forms, but claim that nothing can be raised in that country at a profit. The government is very unstable, the laws unjust and the people are taxed to death. As an example, they say no one can keep a buggy there unless he pays a license of \$300 per year for that priv-

THE FOLSOM CANAL.

THE GREAT WORK GOING FOR-WARD SATISFACTORILY.

How the Water-Power Will be Utilized-Sacramento to be Supplied With Electric Power.

The following article, which appeared in the San Francisco Bulletin last evening, contains many points already published in Fourth street. It was decided to issue inthe Record-Union, and gives some very interesting facts in regard to the proposed use of the water of the great Folsom Canal. It shows that the construction of the canal is going to be of the utmost importance to Sacramento.

Who vided for General W. H. Harrison in Assatement of the assets and Habilities of the California State Bank at the opening of business July 1st is published in the about twenty have already been obtained, but if all of this class now resident in the James Wilson, of Clay, yesterday sent to use of the water of the great Folsom Canal. It shows that the construction of the canal Sacramento:

Although for some time past considerable work has been done on the canal of the Folsom Water-power Company, it has all been of a preliminary character, the officials of the company and the c of the company getting everything in read-iness to take advantage of the low-water of this city and from the prepared programms and long preparation they no doubt will prove very interesting. At 9 a. 1, yesterday the German classes, Professor and the province of the Comparent of the Proposed Canal to the point of the dam, above the Sacramento Carbon Leaf and the Sacramento Carbon Leaf and the Sacramento of the State Prison At this point a wing dam at the reign can be seen that the members of the Board of Education were conspicuous by their absence.

blocks of granite, which are quarried almost on the spot. At only one point will much cutting have to be done for the canal, and this is at a point where the cliffs run out in a V shape. The granite taken from this cutting will be utilized in the bank of the canal, so that while there is a cutting the canal, so that while there is a cutting the canal, so that while there is a cutting the canal, so that while there is a cutting the canal of the amounts to the quarrying of rock there, and no additional labor is used. It is on this work that the greater part of the convicts are at present employed, either in removing the soil from the ledges of granite or in drilling holes for the blasts. The artificial bank or wall of the canal will be Dangler; recitation, "The Star," Albert Dangler; recitation, "Three in a Row," nineteen and one half feet in width at the bottom and ten feet at the top.

The dam, which is intended to not only prevent the wastage of the water in the present channel, but which will also be

used as a storage reservoir, will contain be-tween 10,000 and 12,000 cubic yards of mabron; declamation, "Nicht in die Weite, Miss Lillie Ebert; song, "Auf der Berge gruenem Saume," Mrs. J. C. At present there are in the neighborhood of two hundred convicts employed on various matters connected with the dam and canal, but the estimates made contemplate a force of from 450 to 500 men, every one of whom could 450 to 500 men, every one of whom could be profitably employed. Thus, to lay thirty cubic yards of the dam per day (the underng being that the work is to be prosecuted from both ends at the same time), 158 nen will be necessary; at work on the temporary dam, flume and sand-bags, 20 men; in canal at quarry, 100 men; getting out sand and working on railroad line, 22 mer, making a grand total on the dam and its immediate connections of 310 men. In ad-dition to these, 200 men can be used to good advantage in building the canal wall, or, in other words, for the speedy prosecution of the work not less than 500 men should be in constant operation. One reabeginning of the season's rains. During these eighty days what work is done will have to be carried on, in a great degree, as a finished work, as the heavy freshets would tear the dam out if there were any weak spots about it. The temporary dam and flume will also have the dam out or relatives of deceased members. and flume will also have to be taken out before the river begins to rise, to prevent these being carried away by the floods. The reason the dam is so long is because it will be a section of a circle in shape, and by presenting this great length it is believed there will be less danger from floods during the heavy freshets, and, in addition, be storage capacity will be greater.

CHARACTER OF THE LABOR EMPLOYED. Up to the present time there has been no trouble with the convict labor, the men apparently being well satisfied with their amount of work performed by them has been very satisfactory to the officials of the The Waterworks heard nothing of it, and of been very satisfactory to the officials of the canal company, who report that they go about their work with a cheerfulness that is remarkable. All the labor is furnished by the Board of Prison Directors from among the convicts, with the exception of the engineers and boss masons, who are the engineers and boss masons, who are employed by the canal company. The men of use to them when they leave the prison walls, at present working as carpenters masons, stone-dressers and tending derricks, while quite a number are employed in the rigger loft and the blacksmith shop. A number of derricks are already in pos tion for the placing of granite blocks in the canal wall, while a cable line is being contructed across the dam, which will allow f blocks being taken from one side to the ther. The power for working all these appliances is supplied by steam engines and water motors, the water supply for the lat-ter being furnished by the Natoma Water

Already the company has received numerous inquiries from the East concerning the power that will be developed by the canal, and also regarding the transmission of this power by means of electricity to neighboring towns. It is contended by various companies which are engaged in the manufacturing of electrica motors and machinery that of the power Drager pleaded not guilty. It was ordered that Myers appear for sentence this morn-per cent. can be transferred from Folsom o Sacramento. In other words, of 5,000horse-power at Folsom, 3,500-horse-power can be delivered in Sacramento. This power would be particularly valuable to entists, jewelers, electro-platers and others who do not need much power, but who could use with profit power ranging from horse-power to 1-horse-power.

THE POWER AVAILABLE. But although only 3,500-horse-power will e transmitted to Sacramento by a 5,000horse power motor at Folsom, in reality this power will be double, as it will run night and day. In this manner power which will be used in running machinery by day can be utilized at night for driving the plant of an electric light company. That the power thus furnished will be cheap can be seen from the fact that in Eastern cities water power successfully competes with steam power where the cost of fuel is low, the comparisons being made on a basis of \$1 50 per cord for wood, and The committee has finally decided to ing a much better means of transportation allow the Lash and Irma to contest for the than the horse cars now in use. At presday, but the fact that the new power is cheap will undoubtedly increase the manu-

will be held at the Old Pavinon this evening at 8 o'clock for the purpose of arranging plans and selecting a proper committee to carry them out. A full attendance from all the departments is expected.

There is no doubt in the minds of all mining men that the bed of this river is particularly rich in gold, it having drained one of the richest mining regions in California. The canal company do not propose to prosecute this work on their own behalf, the Superior Court, will sell at auction at the premises, the superior court, and the premises the province of the richest mining regions in California. Worse and More of It. The condition of the fire-alarm system is this city under the present management is getting to be quite alarming. If it is not remedied soon there is no telling what the consequences to the city may be. Yesterday, about one o'clock, a fire was discovered in the roof of a building in the vicinity of Second and L streets. An alarm was turned in from the box at the downtown engine house. That engine and crew went im-mediately to the fire. The alarm they treatment. Their working hours are not as turned in reached only one house, that of the long as those of free laborers, but the hook and ladder on Sixth street. No alarm employed by the canal company. The men are, moreover, learning trades that may be have been very serious

Public Installation Equity Lodge, Knights and Ladies of Honor, had a public installation of officers last evening at Grangers' Hall, which was followed by an interesting literary and musical programme, as follows: Reading, Mrs. Jennie Kilgour; vocal duet, Mr. Des-mond and Miss Fisher; recitation, Clarence P. Arper; cornet duet, the Misses Spargo; John John, an Indian boy, played a har-monica, guitar and triangle all at the same ime, making excellent music; recitation, C. Medley. At the close of the exercises all repaired to the upper hall, where the ladies of the Order had spread a fine ice-cream and cake collation. Dr. Wierd presided at the table, and a number of toasts were responded to.

Museum Association

The Museum Association held its monthly neeting last night, President Green presiding. A very large and interesting addition to the herbarium was contributed by Dr. Pyburn; also, some fine prepared specimens of grasses by Secretary F. E. Ray (these, with valuable data relative to treatment of soils to eradicate Bermuda grass), and fine specimens of beetles from Mrs. Bonheim and Woodson Bros.; also, lignite from the Debric mine and crystalline formations from a White Pine cave, by A. # -+ TO \* TRAVELERS! +

COUR OF THE PRINCIPAL VALISE manufacturers in the United States have sent us sample lines of their goods from which to select our stock for the coming Fall. The consequence is that the assortment we are now showing is more varied than at any other time during the season. There are more extreme novelties in stock than we usually carry, and the intending purchaser who cannot now be suited must indeed be very exacting. For instance, in the line of Tourists' Valises (the kind that are worn with a strap over the shoulder), we have a line of sizes made of alligator skin, highly polished, ranging in price from \$2 50 to \$5 50, according to size. There is another Valise made in the shape of a log cabin, opening in the top with a patent lock, making it very handy and convenient for packing closely. Prices, \$9, \$10 and \$11, according to size.

There is a Club-shaped Valise, made out of genuine sealskin, color black, and mounting of brass.

A close imitation of the above, one indeed that is often sold for seal, is a Valise made of grain leather. The coloring, finish and trimming are the same, but material of course different. These we have at \$6, \$7, \$8 and \$9.

There is a small sized Hand-Satchel, made of alligator, with brass mountings and a new style of lock, just large enough to hold a comb and brush and a few other necessary articles for a short trip. Prices, \$4 40, \$4 80, \$5 10 and \$6.

A Valise entirely new in material and design. It is made of macrame, and finished on the bottom and sides with alligator. Price, \$5 and \$6.

Other styles of Valises from 65 cts. to \$21.

Not everyone knows that we have one of the largest collections of Silver Plate in town, and sell it very carefully. What we have we know to perfection. There is such a thing as knowing.

BAKING SOUTHERN

ABSOLUTELY PURE

raising, the Royal Baking Powder is superior to all other leavening agents. It ... ... Dutely pure and wholesome and of the highest leavening power. It is always uniform in strength and quality and never fails to make light, sweet, most palatable and nutritive food. Bread, biscuits, muffins, cake, etc., raised with Royal Baking Powder may be eaten hot without distressing results to the most delicate digestive organs. It will keep in any climate without deterioration.

Prof. H. A. Mott, U. S. Government Chemist, after examining officially the principal baking powders of the country, reported:

"The Royal Baking Powder is absolutely pure, for I have so found it in many tests made both for that company and the United States Government.

"Because of the facilities that company have for obtaining perfectly pure cream of tartar, and for other reasons dependent upon the proper proportions of the same, and the method of its preparation, the Royal Baking Powder is undoubtedly the purest and most reliable baking powder offered to the public.

"DR. HENRY A. MOTT, PH. D.,"

SAN FRANCISCO, July 11th.

FLOUR—The China steamer, to sail to-morrow, is expected to take over 8,000 bbls. Net cash prices for California Extras, \$4@4 25 \( \frac{1}{25} \) bbl; Superfine \$2 90@3 25.

WHEAT—The market is shaping more in fawheat—the market is snaping more in rayor of sellers, though no particular increase in trade is observable. There is considerable sampling in progress, and a fair volume of business is being transacted, but the amount changing hands is not of sufficient magnitude to give the structure appearance. Beautiful and the contraction and the second sufficient magnitude to give the situation a notably active appearance. Be-fore the close of the month, however, it is fore the close of the month, however, it is hoped that shipping operations will become of much more general character. Or the Liquor Habit Positively Cured by Administering Dr. Haines'
Golden Specific.

It can be given in a cup of coffee or tea without the knowledge of the person taking it; is absolutely harmless, and will effect a permanent and speedy cure, whether the patient is a moderate drinker or an alcoholic wreck. Thousands of drunkards have been made temperate men who have taken Golden Specific in their coffee without their knowledge and to-day believe they quit drinking of their own free will. I'I Nr VER FAILS. The system once impregnated with the Specific, it becomes an utter impossibility for the liquor appetite to exist. For sale by JOS.
